Project: Braf inhibition as an alternative to chemotherapy in the treatment strategy of hairy cell Leukemia

Medical Executive Assistant:
-Advanced Administrative Support Activities
● Management of medication requests and the necessary procedures for prescription and procurement of pharmaceuticals (assistance with off-label/compassionate use/ CNN drug requests, registration of therapeutic plans, completion of AIFA forms, etc.)
● Pharmacovigilance activities and reports.
● Organization and scheduling of diagnostic tests and medical visits, handling booking and coordination of related appointments.
● Preparation and verification of clinical documentation and required administrative forms, ensuring accuracy and compliance with regulatory standards.
● Reduction of the bureaucratic burden on physicians
● Streamlining and speeding up administrative processes, freeing up valuable time to improve quality of care.

-Multidisciplinary Coordination
● Mediation and facilitation of communication between physicians and specialized departments or other healthcare services, promoting effective management of clinical pathways.
● Support in planning and monitoring care pathways, with attention to continuity of care.

-Mobility and Operational Flexibility
● Ability to move between different medical offices, clinics, or departments based on service needs and clinical scheduling.

● Adaptability to various contexts and work teams, providing flexible support to physicians in operational settings.

-Patient Assistance
● Support to patients in handling administrative procedures, providing guidance through registration and access to services.
● Improvement of patient experience through clear communication

-Implementation of Innovative Solutions
● Identification of opportunities to improve administrative processes through the use of modern technologies and methodologies.
● Proposal of organizational and management solutions to increase efficiency

Study Coordinator – Multiple Myeloma Clinical Trials (EMN-18, EMN-20, ISABEL, UNITO-FORTE…) and Pharmacist for observational clinical trials on Multiple Myeloma

- Managed eCRF entry and data quality control (via REDCap and EMNTG.org)
- Handled investigational drug logistics: receipt, storage, dispensing, and reconciliation
- Coordinated and reviewed clinical treatment schedules for enrolled patients
- Attended monitoring and SIV activities to support ICH-GCP compliance
- Maintained direct communication with patients/families; facilitated sponsor-site relations
- Conducted AE/ADR reporting in line with protocol and regulatory timelines
